About me

I am a Junior Full Stack Developer. My professional career began in the field of engineering, but I am now facing a new challenge: becoming a Senior Full Stack Developer. For several years, I have been training in various technologies and frameworks for web application development.

I am currently seeking opportunities that will allow me to grow both personally and professionally.

I am a fast learner, enjoy working in teams, and above all, I strive to create a work environment where everyone can support each other.
